Web Development & Hosting Services Proposal

Prepared for: Drop Haus

Prepared by: Matthew Cho

Date: March 7, 2026

Reference: DH-2026-001

Executive Summary

This proposal outlines the web development and hosting services delivered for Drop Haus, a premium blank apparel manufacturer. The platform has been designed and built to serve as the company's primary digital presence, wholesale customer acquisition system, and brand collaboration showcase.

Scope of Work Delivered

1. Public-Facing Website

A fully custom-built website featuring:

- **Home Page** — Brand hero section, product category navigation, feature highlights, and call-to-action sections
- **Product Catalog** — Filterable product catalog by category (T-Shirts, Hoodies, Sweats, Jackets) with individual product detail pages featuring size selection, color swatches, fabric specifications, and pricing
- **Collaborations Page** — Dedicated showcase for brand partnerships and collaborative collections with individual collection pages
- **About Page** — Company story, manufacturing process, and brand values
- **Contact Page** — Contact form with database-stored submissions

2. Wholesale Verification & Onboarding System

A complete wholesale customer acquisition pipeline:

Wholesale Application Form — Public-facing form collecting:

- Business Name & Business Type (Retailer, Online Store, Distributor, Other)
- EIN Number & Resale Certificate Number
- Contact Name, Email, and Phone Number
- Business Address & Additional Details

Application Review Dashboard — Admin panel for Drop Haus to:

- View, filter, and search all incoming wholesale applications
- Review full application details and approve or reject with internal notes
- Generate unique account creation links upon approval

Wholesale Portal — Authenticated access for approved wholesale accounts to view wholesale pricing and bulk pricing tiers

3. Administration Dashboard

A protected admin panel featuring applications management, products management, collaborations management, and wholesale accounts oversight.

4. Integration Architecture

The platform has been built with integration-ready architecture for:

- **Shopify** — Service layer prepared for product synchronization, checkout/payment processing, and order management
- **ApparelMagic** — Service layer prepared for ERP integration including inventory sync, order fulfillment, customer CRM, and production tracking

5. Technical Specifications

Component	Technology
Framework	Next.js 14 (React)
Language	TypeScript
Styling	Tailwind CSS
Database	PostgreSQL (Neon)
ORM	Prisma 7
Hosting	Vercel

Pricing

Website Development

Item	Amount
Custom website design & development (full scope as described above)	**$3,500.00**

Payment Terms: Full payment due upfront prior to the transfer of code, credentials, and deployment access.

Hosting Options

Drop Haus may choose one of the following hosting arrangements:

Option	Details	Cost
Option A — Self-Managed	Drop Haus pays hosting providers (Vercel, Neon) directly using their own accounts. Setup assistance and account transfer included.	Provider costs only
Option B — Managed Hosting & Maintenance	Matthew Cho manages all hosting infrastructure and provider payments on Drop Haus's behalf, including routine dependency updates to keep the platform current and stable.	**$1,500.00/month**

Media Content (Optional)

The development fee covers the design and build of the website only. The website currently uses placeholder imagery. For a launch-ready site, professional media content is recommended:

Item	Includes	Amount
Media Content Package	Professional product photography, lifestyle imagery, and video content for the website — covering hero sections, product catalog, about page, and collaboration showcases	**$2,500.00**

This is an optional add-on. Drop Haus may alternatively provide their own media assets for integration into the website at no additional cost.

Hosting & Maintenance Agreement

Term

This agreement covers a period of **one (1) year** from the date of execution, beginning on the date both parties sign this agreement.

Hosting Services Include:

- Website hosting on Vercel's global edge network
- PostgreSQL database hosting via Neon
- SSL certificate (HTTPS) management
- Uptime monitoring
- Domain configuration and DNS management (domain registration costs, if any, are separate)
- Routine security updates and dependency maintenance

Renewal & Renegotiation

Upon expiration of the initial one (1) year term, either party may propose revised terms for continued hosting and maintenance services. Both parties agree to enter renegotiation in good faith no later than thirty (30) days prior to the expiration of the current term. If no new agreement is reached, services will continue on a month-to-month basis under the existing terms until a new agreement is executed or services are terminated with thirty (30) days written notice.

Design Finalization & Change Policy

Design Approval Process

Upon delivery, Drop Haus will have a review period to request revisions and adjustments to the website design. Both parties will work collaboratively to reach a finalized design that meets Drop Haus's satisfaction.

Post-Finalization Changes

Once both parties agree in writing (email confirmation is sufficient) that the website design is finalized:

- **Any subsequent design changes, feature additions, or modifications** to the website will be subject to a **$250.00 USD fee per change request.**
- A "change request" is defined as any modification to the website's layout, functionality, content structure, or styling that requires development work.
- Minor content updates (e.g., updating text, swapping product images, adding/removing products through the existing admin panel) are **not** considered change requests and can be performed by Drop Haus at no additional cost through the admin dashboard.
- Each change request will be scoped and confirmed before work begins.

Intellectual Property & Ownership

Full Ownership Transfer

Upon execution of this agreement, **Drop Haus shall own the entirety of the system**, including but not limited to:

- All source code, frontend and backend
- Database schema and structure
- Design assets, layouts, and styling
- API integrations and service architecture
- All documentation

Drop Haus will have full rights to modify, redistribute, or transfer the codebase at their discretion. A complete copy of the codebase and all credentials will be provided to Drop Haus upon request.

Exclusions

The following are not included in the ownership transfer:

- Third-party service accounts (Vercel, Neon, Shopify, ApparelMagic) — these remain under whatever account holds them and can be transferred to Drop Haus-owned accounts upon request
- Open-source libraries and frameworks used in the project, which remain under their respective licenses

---

Acceptance

By signing below, both parties agree to the terms outlined in this proposal.
